Cold Brew COFFEE

Cold-Brew coffee is a megatrend in the States which is now coming over to Europe more and more. Starbucks and Costa have already started to roll it out. Due to its special production method this coffee contains **less bitterness** and **less acid** and can be enjoyed cold without milk or sugar. By adding nitrogen you can create an exciting look (like Guinness beer) and a creamy flavor experience. This variation is called Nitro-Cold-Brew or Nitro-Coffee. This coffee drink is refreshing and is served on draught.
