CLASSIC BEER

CLASSIC BEER TAP

COSPI104

The CLASSIC model is the best-selling tap across Europe in the market of professional dispensing beverage systems and equipments. This tap combines practicality and tradition and cost-efficiency, without neglecting quality of each single component and part.

Fully made in Italy in our manufacturing company, it guarantees a long-life in time and above all a perfect interchangeability of the pieces of which it is composed. It can be found in the version with and without compensator for the flow regulation, in polished chrome or golden-plating finishing. Generally comes equipped with the back standard shank 5/8"x35 or 1/2"x35 and the steel spout.

TOP BEER

TOP TAP COSPI308

Surely one of the best choices you can make about the beverage dispensing faucets. Beyond a shadow of a doubt our TOP-TAP is the top of the range; currently thanks to its high-quality and its precise functioning is the best-seller tap in our factory. We're really proud of this product, because we know that it makes feel our customers completely satisfied, that's what they say. Fully made of stainless steel AISI 316L, the best type of st. steel, thanks to which we obtained the famous SK-APPROVAL certification from the German Institute. This fact permits you to dispense any sort of beverages, starting from beer, water, soft drinks until you get to wine and sparkling wine; it can works to 7 bar pressure ; very easy to disassemble and clean.

It's available in 2 different versions, with the internal spring and without spring, it just depends on your needs or according to your tapping-methods. Great performance in one great faucet.

COSMO DRINKS

COSMO BALL-TAP COSPI2065

Our COSMO ball-tap is the unique synthesis of all the qualities that a beer tap must have in a professional sector. It represents quality, strength and beauty. By the touch you can easily understand its importance, when handling its knob you can immediately feel the perfect combination of its components, when you see the flow of beer fall into the glass you really figure out the high-quality of this product. Its main feature is to have a real precise vernier of flow regulation placed behind the body which directly regulates an elliptical shaped compensator. The entire line of passage of the beverage is made of stainless steel and Teflon, perfect raw-materials for food contact. As per our usual policy you can find the COSMO tap in different versions and finishing, with and without compensator. Also suitable for water dispensing.

STAUT-NITRO COFFEE

NORDIC TAP

COSPI9165

Our NORDIC tap is the perfect evolution of our faucets. Optimal combination of elements and components, a high-end product for professionals; NORDIC is a complete 360 degrees tap which can be used for the classical beer but especially for STOUT beers and NITRO-COFFEE as well and why not also for WINE. Available both in the full-steel version or chrome-plated brass, with and without compensator. The use of the special elliptical compensator allows a very precise and regular flow regulation. It works really good with high pressures either by Co2 or Nitrogen.

WINE-DRINKS

ACE TAP

Our ACE-TAP is a perfect match of acetal plastic material and the best stainless steel, a combination of enormous potential. Mainly born for the tapping of wines and sparkling wines, it can also be used for all types of drinks. Our great satisfaction is that of having created a one-of-a-kind product, completely different from the usual plastic taps that have been on the market for several years, thanks to its elegance shapes, its unique style, and versatility of use. This is NOT meant to be absolutely just a poor plastic faucet devoid of any concepts, this is the ACE TAP, a new solution for all the bartenders and all the players in the sector. And what to say about the different colors available in our range? Not just funny but...

WINE-BEER

IBERICO SIDE-PULL TAP COSP11220

One of the most famous beer taps all over Spain, It's the typical side-pull tap with the horizontal opening, this is our IBERICO tap. In its simplicity, It encloses the same technology of compensation of our COSMO & NORDIC taps. So the Spanish tradition is combined with the quality, and with rough but elegant lines and shapes. At the same time a touch of novelty on the external finishing makes this faucet stylish and cool; we provide this model of tap with a special satin chrome finish which explicitly refers to steel.
